

JOY OGUKAH

FRONT-END DEVELOPER

Enugu, Nigeria | [+234814-805-0257](tel:+234814-805-0257) | ogukahjoy@gmail.com

SUMMARY

Front-End Developer skilled in React, TypeScript, and Firebase, with experience building responsive web applications. Solves technical problems effectively and writes clean, functional code. A clear communicator and collaborative team player focused on building great user experiences. Learns new technologies quickly and is ready to contribute to a development team.

TECHNICAL SKILLS

React	Redux	GraphQL & REST APIs
TypeScript	Firebase	Version Control
JavaScript	Responsive UI & UI Frameworks	Jest & React Testing Library

WORK EXPERIENCE

Front-End Developer, Freelance

Sept 2022 - Present

Developed custom websites and web applications for clients on contract basis.

- Built responsive, user-friendly interfaces using React, JavaScript, and CSS.
- Integrated Firebase for authentication, real-time data, and back-end functionality.
- Collaborated with clients to translate requirements into technical solutions.

Programming Tutor, SuperProf

Jan 2022 - April 2025

- Explained complex concepts (React, Redux, JavaScript architecture) to diverse learners.
- Debugged student code and optimized solutions for scalability.
- Created project-based learning modules mirroring real-world workflows.

RELEVANT PROJECTS

All projects available on <https://github.com/jayooohy>

- **PantryPal – Recipe Finder** | React, Redux-Saga, Tailwind CSS: Developed a modern recipe discovery app with category browsing, detailed recipe pages, trending/latest sections, and ingredient-based search with client-side pagination. Implemented scalable state management using Redux Toolkit, Redux-Saga, and Redux-Persist, styled with Tailwind CSS and ShadcnUI for accessibility. Added features like theme toggling, smooth image loading, and lazy-loaded routes for a production-ready experience.
- **E-Commerce Store** | React, Redux, Firebase: Developed a responsive online store with product listings, cart management, and user authentication. Managed global state with Redux for cart operations and integrated Firebase for data persistence.
- **Money Trail – Personal Finance Tracker** | React, TypeScript, Redux Toolkit, Tailwind CSS, VitePWA: Built a responsive PWA for tracking income and expenses with categorized transactions, charts, and offline support. Implemented dark/light themes, persistent state management with Redux Persist, and dynamic data visualizations using Recharts.

EDUCATION

Mechatronic Engineering

University of Nigeria, Nsukka

Complete React Developer

Zero To Mastery Academy
